

Fully Digital Soft Starters, IP20 or IP43

Fairford's fully digital non-energy optimising MFE Soft Starters are the simplest and most economic way of starting your three phase induction motors. They have automatic set-up features selectable by changing a 10 way application profile selector switch.

The MFE offers easy-to-use technology suitable for a wide variety of applications and is available in IP-20 and IP-43. IP-43 is ideal for retrofit and 'splashproof' applications such as food manufacturing or where you have an existing DOL starter or an existing Star/Delta starter to replace.

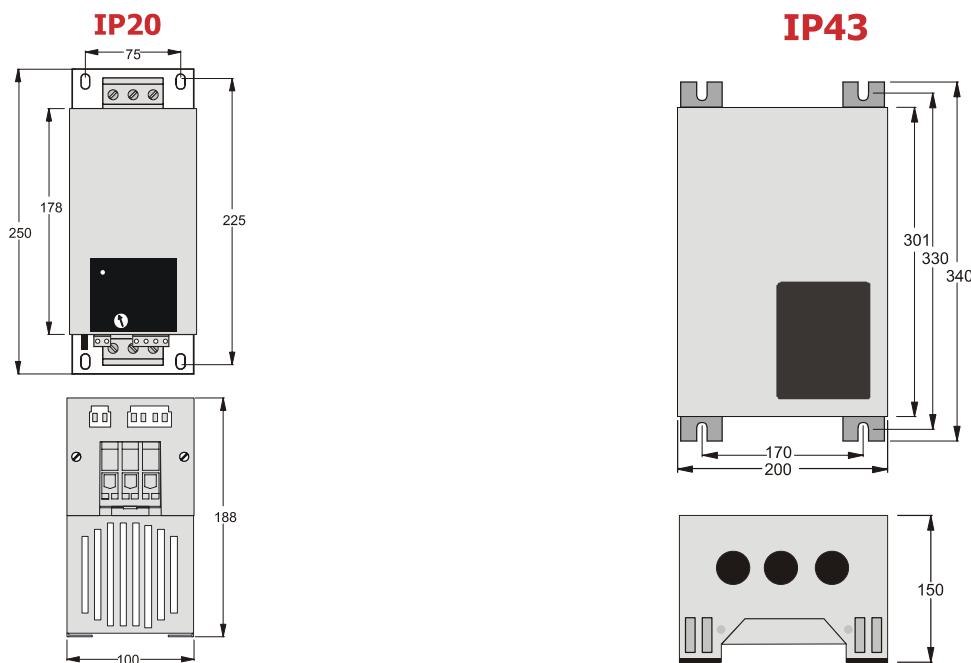

Main Features
