REFLEX/SCANFLEX MULTIFLEX MINIFLEX LR MICROFLEX-C

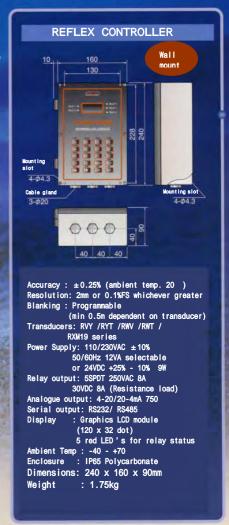

ULTRASONIC LEVEL INDICATOR

TYPICAL NON-CONTACT LEVEL METER!
OUTSTANDING SOFWARE MAKES HIGHLY STABLE AND RELIABLE.
A WIDE RANGE OF APPLICATIONS FROM SOLIDS TOLIQUIDS,
MEASUREMENT IN LONGER RANGE WITH
MULTI-POINT SCANNING SYSTEM

From Long-range Measurement to Multi-point Scanning, Excellent Ultrasonic Level Meter!

VERSATILE

Multi-channel non-contact ultrasonic level controller for liquids, slurries & solids from 1 up to 10 points of level measurement. It can store data and output orderly or arbitrarily. Its measuring range up to 50 meters.

MEASUREMENT & CONTROL

An analogue output and up to two relays per point can be achieved by the addition of SA-10 analogue and SR-10 relay cards to the system.

FAST

Scanning of ten points can be achieved in under 30 seconds on liquid applications. Scan times are programmable but dependent on the application.

HYCONTROL Multi-control System

REDUCING COST PER POINT

The Multiplexor SM-10, added to the Reflex, enables to scan up to 10 separate points of level, thus reducing the cost per point for each additional tank or silo monitored. SM-10 can remotely be added.

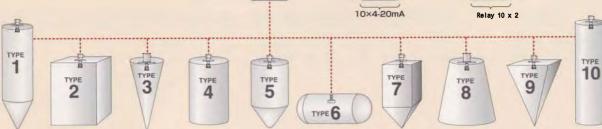

SERIAL COMMUNICATION

RS485

module SA 10

RS232 port allows transfer of level data for all 10 points, and provides the means for fast commissioning when using Vision System software.

> Relay module SR10

REFLEX TRANSDUCER

RYV15 RYT15 (Inbuilt Temp Sensor)

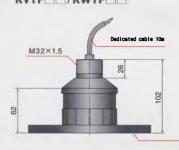

Body material: PVDF Face material: Epoxy Frequency : 41.5KHz Beam angle: 12° Min dead band: 0.3m Max range liquids: 20m Max range solids: 10m Ambient temp: -40 - +90 Haz. area: EExm IIT6 Protection: IP68 Mounting: M20 x P1.5 Weight: 2.0kg

RWV15 RWT15 (Inbuilt Temp Sensor)

Body material: PVDF Face material: PVDF Frequency: 41.5KHz Beam angle: 12 ° Min dead band: 0.3m Max range liquids: 20m Max range solids: 10m Ambient temp: -40 - +90 Haz. area: EExm IIT6 Protection: IP68 Mounting: M20 x P1.5 Weight: 2.0kg

RYVF /RWVF (Inbuilt Temp Sensor) Body material: PVDF RVTF /RWTF

Face material: Epoxy /PVDF Frequency: 41.5KHz Beam angle: 12 ° Min dead band: 0.3m Max range liquids: 20m Max range solids: 10m Ambient temp: -40 - +90 Haz. area: EExm IIT6 Protection: IP68 Mounting: M20 x P1.5 Weight: varied by flange size

Flange(plastic)

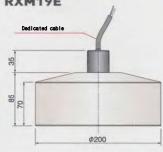

4*/3* ASME, DN80/100

RXM19 Dedicated cable Ф200

Face material: Polyethylene Frequency: 19KHz Beam angle: 8 ° Min dead band: 0.75m Max range liquids: 30m Max range solids: 20m Ambient temp: -20 - +60 Haz. area: No Protection: IP65 Mounting: M20 x P1.5 Weight: 2.8kg

Body material: Polypropylene

RXM19E

Body material: Polypropylene Face material: Polyethylene Frequency: 17KHz Beam angle: 5 ° Min dead band: 1.0m Max range liquids: 50m Max range solids: 35m Ambient temp: -20 - +60 Haz. area: No Protection: IP65 Mounting: M20 x P1.5 Weight: 4.8kg

*The min. dead band and the max.range are varied by the operating temperature and environments.

MULTIFLEX

Providing all the functionality of level control ranging from solids to liquids whatever the conditions may be.

FEATURES

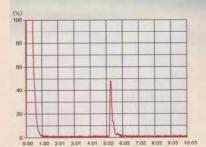

It can operate in dirty, dusty environments, and a high degree of resolution and functionality enables it to apply to diversified applications.

It can be protected from any unauthorized access if a password is used. It maintains the high level of

Linearisation for 7 different vessel shapes held in memory, its volume conversion is easier.

It can accept power supplies of either DC or AC volt.

There is no need for separate programmers or computers to set up but all you need is to set up necessary parameters using the kevpad.

DIVERSITY

In applications on solids, it can operate in adverse environments such as dirt and dust. For liquids, it can achieve a high-degree of resolution and functionality. It can satisfy the requirements necessary for liquid and solid applications in one instrument, in either a panel or wall mount enclosure. SECURITY

It can be protected from any unauthorized access if a password is used. MULTIPLE POWER SUPPLIES

It can accept power supplies of either 110 or 230 volt AC. A separate 24 volt DC input is provided on every unit for those who want to operate on a safe DC voltage or provide back-up in case of power failure.

INTEGRAL CONSOLE

Neither complex codes or programming nor separate programmers or computers to set up are required. All you need is to set up necessary parameters using the keypad. **VOLUME CONVERSION**

Linearisation for 7 different vessel shapes is held in memory

Accuracy: ±0.25% (ambient temp. 20) Resolution: 2mm or 0.1%FS whichever greater

oscillation loss of ultrasonic wave

Integral Amplifier • Two-wire Loop Powered Simple to Calibrate and Use Empty Distance and Span can be entered

TWO WIRE ULTRASONIC LEVEL TRANSMITTER

MICROFLEX-C

FEATURES

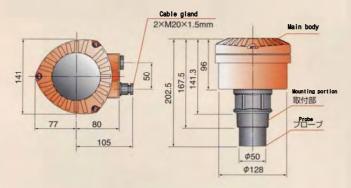

The setup is simple as you set up with push buttons while seeing the LCD.

You can select to indicate LCD either by meter, feet or inch The transducer material consisting of PVDF that is corrosion resistant, it can have a wide range of applications.

It has a False Echo Rejection function that enables the instrument to identify two fixed obstructions, memorize their position and ignore them during the measuring process.

Principle of Operation
An ultrasonic pulse is
emitted from a sensor
down towards the media
and is reflected back
from the surface. The
time it takes to travel
from/to the sensor is
proportional to the
distance traveled.

OUTLINE DIMENSIONS

Accuracy : ± 5 mm (<1m) / ± 0.5 %FS (>1m)

Resolution: 1mm Max. range: 8m Beam angle: 12° Min. dead band: 0.3m

Power Supply: 12-30VDC(two wire loop powered)

Analogue output: DC4-20mA 750

Serial output: ---

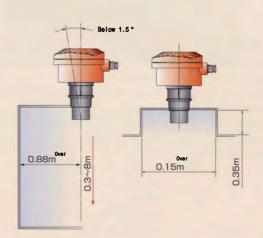

Display : digital LCD
Ambient Temp : -40 - +70
Housing : Glass filled nylon

Wet side : PVDF Protection : IP67 Weight : 850g

INTERIOR

MOUNTING GUIDELINES

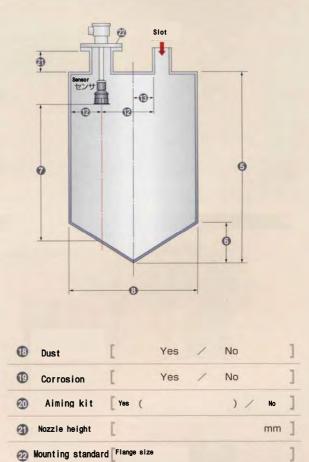

HYCONTROL VISION SYSTEM

REFLEX/SCANFLEX & MULTIFLEX can be connected to PC with serial outputs. A dedicated software (option) can be used to allow all echoes of ultrasonic waves to be viewed in trend analysis, thus enabling to make a higher degree of setup.
