

## SPG SERIES

Tank gauges SPG series are available with stainless steel wetted parts for all liquid applications compatible with AISI 316 stainless steel.

Special materials as Titanium or HC276 can be considered.

Mounting of the sensor, internally or externally of the tank, meet practically all existing installation requirements.

The SPG Self Powered Gauges have been designed for Marine and Industrial applications. They are completely autonomous and provide remote continuous indication of tank contents without using any external energy.

Indicators are of stainless-steel construction. Calibration in unit of volume and/or depth of liquid.

Each scale is individually calibrated and printed on dial.

### APPLICATION FIELDS & FEATURES

- Marine Certification (RINA)
- ATEX certification
- Standard EN-837-3
- Sea water, Oil and Chemical Resistant
- Submersible or externally mounted sensor

## TECHNICAL FEATURES

### General Features

Indicator Nominal Diameter:	DN 100 DN 150
Capillary Length:	Up to 30 m
Calibration:	According to customer specified head or volume units and tank reference (Standard m <sup>3</sup> )

### Measurement Performance

Accuracy:	Class 1 (*)
Error introduced by diaphragm seal and capillary:	<±1,5% FS @ +25°C
System accuracy (0 ÷ 60°C):	<±2% FS (**)
Overload:	150 % FS

### Notes

- (\*) Typical at standard conditions between 10% and 90% FS @ 25°C
- (\*\*) Accuracy related to a 30 meters capillary instrument

## ENVIRONMENTAL FEATURES

### Environmental Conditions

Working temperature limits:	Process: -20 ÷ 130°C Ambient: 0 ÷ 60°C
Ingress protection degree:	Sensor: IP68 @ 30 mH <sub>2</sub> O Indicator: IP65

## APPROVALS

### Type Approvals

Directive 2014/34/EU (ATEX)

Marine type approval

In compliance with applicable requirements of RINA type approval system
